

移动式发电机组 Mobile generator sets

普通移动式发电机组额定时速为15km/h, 转弯角度180度全方位迅速转弯。

特殊移动式发电机组额定时速为50km/h, 最大转速90km/h, 转弯角度180度全方位迅速转弯。

我司自主研发生产移动型拖车式柴油发电机组, 使柴油发电机组移动方便并安全稳定运行。

备注: 其他厂家所使用拖车大部分转弯角度为直角90度, 转弯弧度受限使用极为不便。

我司移动拖车基础牢固扎实, 上面能承受各个款式柴油发电机组, 还可以安防雨罩, 能使柴油发电机组在下雨天无故障, 完全不受影响正常运转;除了可以安装防雨罩之外, 还可以安装静音箱, 在市区做工程既方便又不影响市民。移动式柴油发电机组很适合市政工程, 高速公路等项目使用。

The rated speed of ordinary mobile generator sets is 15km/h, and the turning angle is 180 degrees for rapid all-round turning.

The rated speed of special mobile generator sets is 50km/h, the maximum speed is 90km/h, and the turning angle is 180 degrees for rapid all-round turning.

Our company independently develops and produces mobile trailer diesel generator sets, which makes diesel generator sets easy to move and safe and stable to operate.

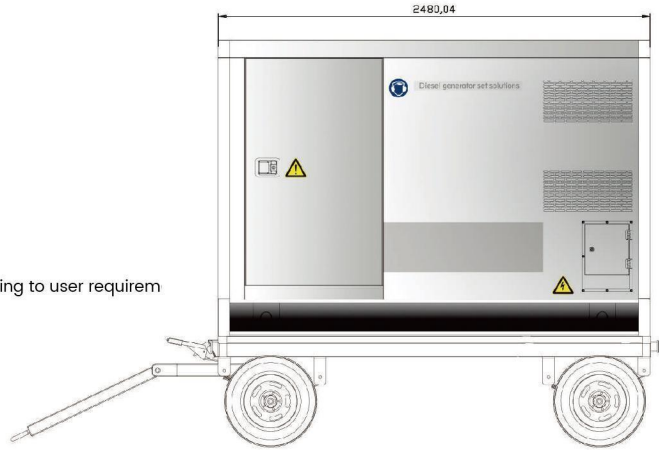

Note: Most of the trailers used by other manufacturers have a turning angle of 90 degrees at right angles, and the turning radius is limited, which is extremely inconvenient to use.

The foundation of our mobile trailer is solid and solid. It can withstand various styles of diesel generator sets, and it can also be installed with rain covers, which can make the diesel generator sets trouble-free on rainy days and completely unaffected to normal operation; in addition to installing rain covers, it can also install silent boxes, which is convenient for urban projects without affecting citizens. Mobile diesel generator sets are very suitable for municipal engineering, highways and other projects.

移动增设选配件 Mobile additional accessories

- 01** 电缆接线头
Cable terminal
- 02** 低噪音放音罩等配件
Low-noise sound hood and other accessories
- 03** 油箱(可供4~8小时)
Oil tank (can be used for 4 to 8 hours)
- 04** 电缆及电缆盘(电缆长度可按用户要求配置)
Cable and cable drum (cable length can be configured according to user requirem
- 05** 手动、气动刹车装置:
Manual and pneumatic brake device:
- 06** 伸缩型机械支腿。
Retractable mechanical legs.
